LOGO ←

PRIMARY LOGO

The MEOLAA primary logo serves as the core identifier of the brand. Designed with a modern, clean sans-serif typeface, it reflects the brand's bold and inclusive nature. Its most distinctive feature is the custom "E" that forms an arrow pointing towards the M—symbolizing selection, curation, and conscious choice. This arrow signifies that when you choose Meolaa, you're making an intentional pick.

MEOLAA

CLEARSPACE

To maintain visual clarity and ensure maximum impact, the MEOLAA logo must always be surrounded by a minimum amount of clear space. This space acts as a protective buffer and prevents any visual clutter or interference from surrounding elements. The minimum clearspace is defined by the height of the letter “M” in the logo, denoted here as X. No text, imagery, or graphic elements should intrude into this area. Respecting this space ensures that the logo retains its legibility, presence, and visual authority across all applications.

LOGO COLOURS

The MEOLAA logo has been designed for flexibility across light and dark backgrounds. The primary logo colors include the signature planet blue and Ecu. Try to Use the Planet Blue Logo wherever possible. Always ensure there is enough contrast between the logo and its background to maintain legibility and brand clarity.

MEOLAA

MEOLAA

SIZING

To ensure legibility and brand recognition, the MEOLAA logo should be scaled proportionally and never distorted.

PRINT COMMUNICATION

The minimum size for print applications is 3mm in height.

DIGITAL COMMUNICATION

The minimum size for digital applications, it is 8px in height.

When resizing the logo, always maintain the aspect ratio and provide sufficient clear space around the logo to avoid crowding or visual clutter.

MEOLAA

MEOLAA

MEOLAA

MEOLAA

MEOLAA

3mm for print 8px for digital

DON'TS

M€OLAA ×

Do not add a gradient to the logo.

M€OLAA ×

Do not distort or wrap the logo in any way

M€OLAA ×

Do not stretch the logo vertically or horizontally.

**M€O
LAA** ×

Do not stack the letters.

M€OLAA ×

Do not change the logo colour apart from the brand colours.

M€OLAA ×

Do not add a shadow to the logo.

M€OLAA ×

Do not tilt the logo.

M←OLAA ×

Do not change the typeface nor recreate or manipulate the typeface or arrow.

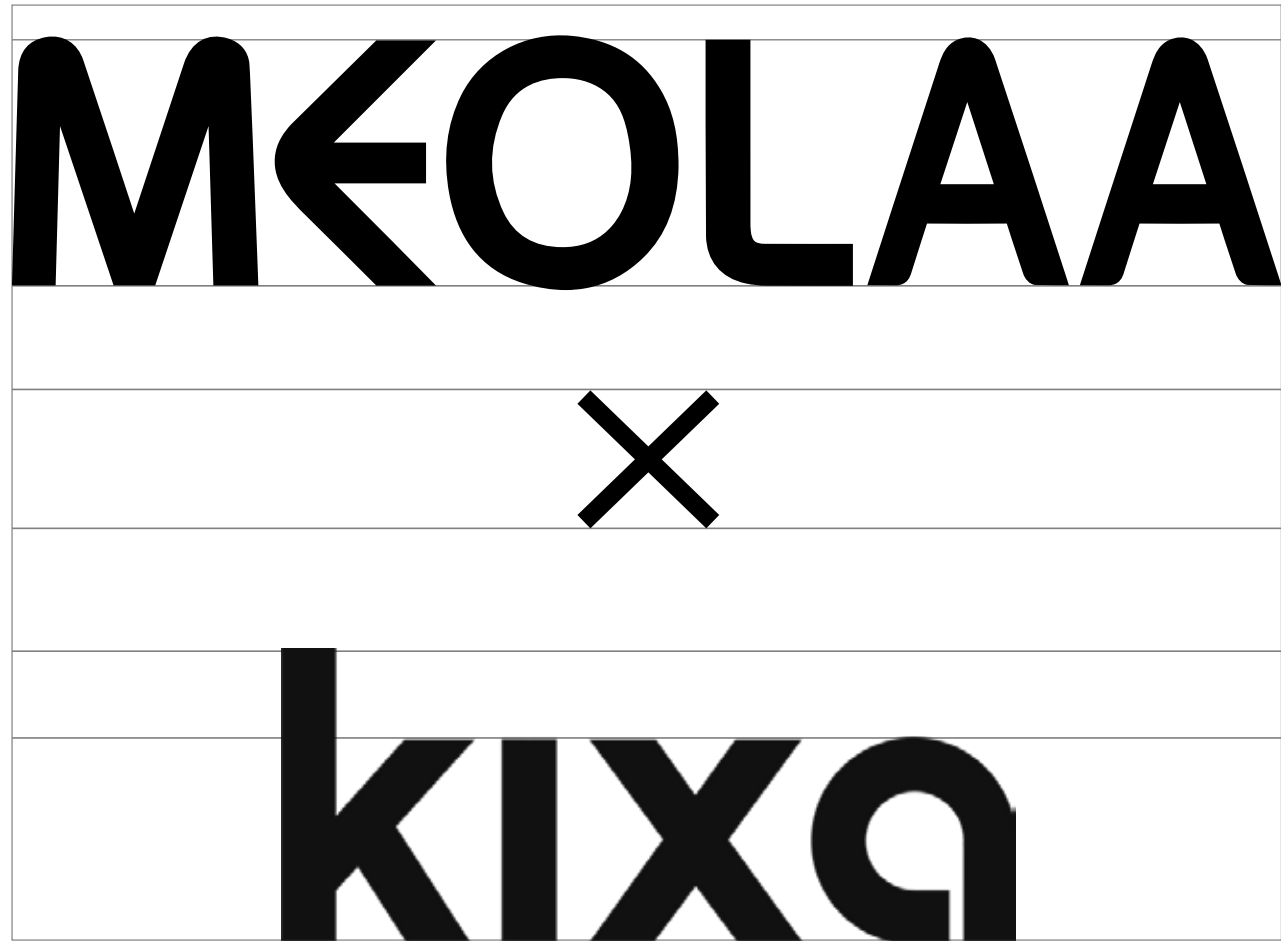

M€OLAA ×

Do not make the logo in an isometric 3d style.

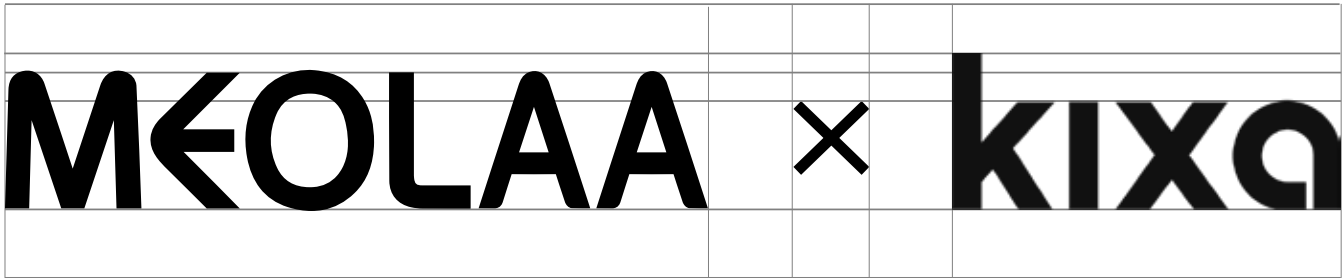

LOCKUPS

The MEOLAA logo can be paired with partner or sub-brand logos using predefined lockups to ensure visual harmony. Two lockup formats are supported: vertical and horizontal. In both layouts, the logos are aligned centrally with consistent spacing, and the separator “x” is used to denote collaboration. Always maintain the grid proportions and spacing shown here to preserve clarity and balance.

VERTICAL

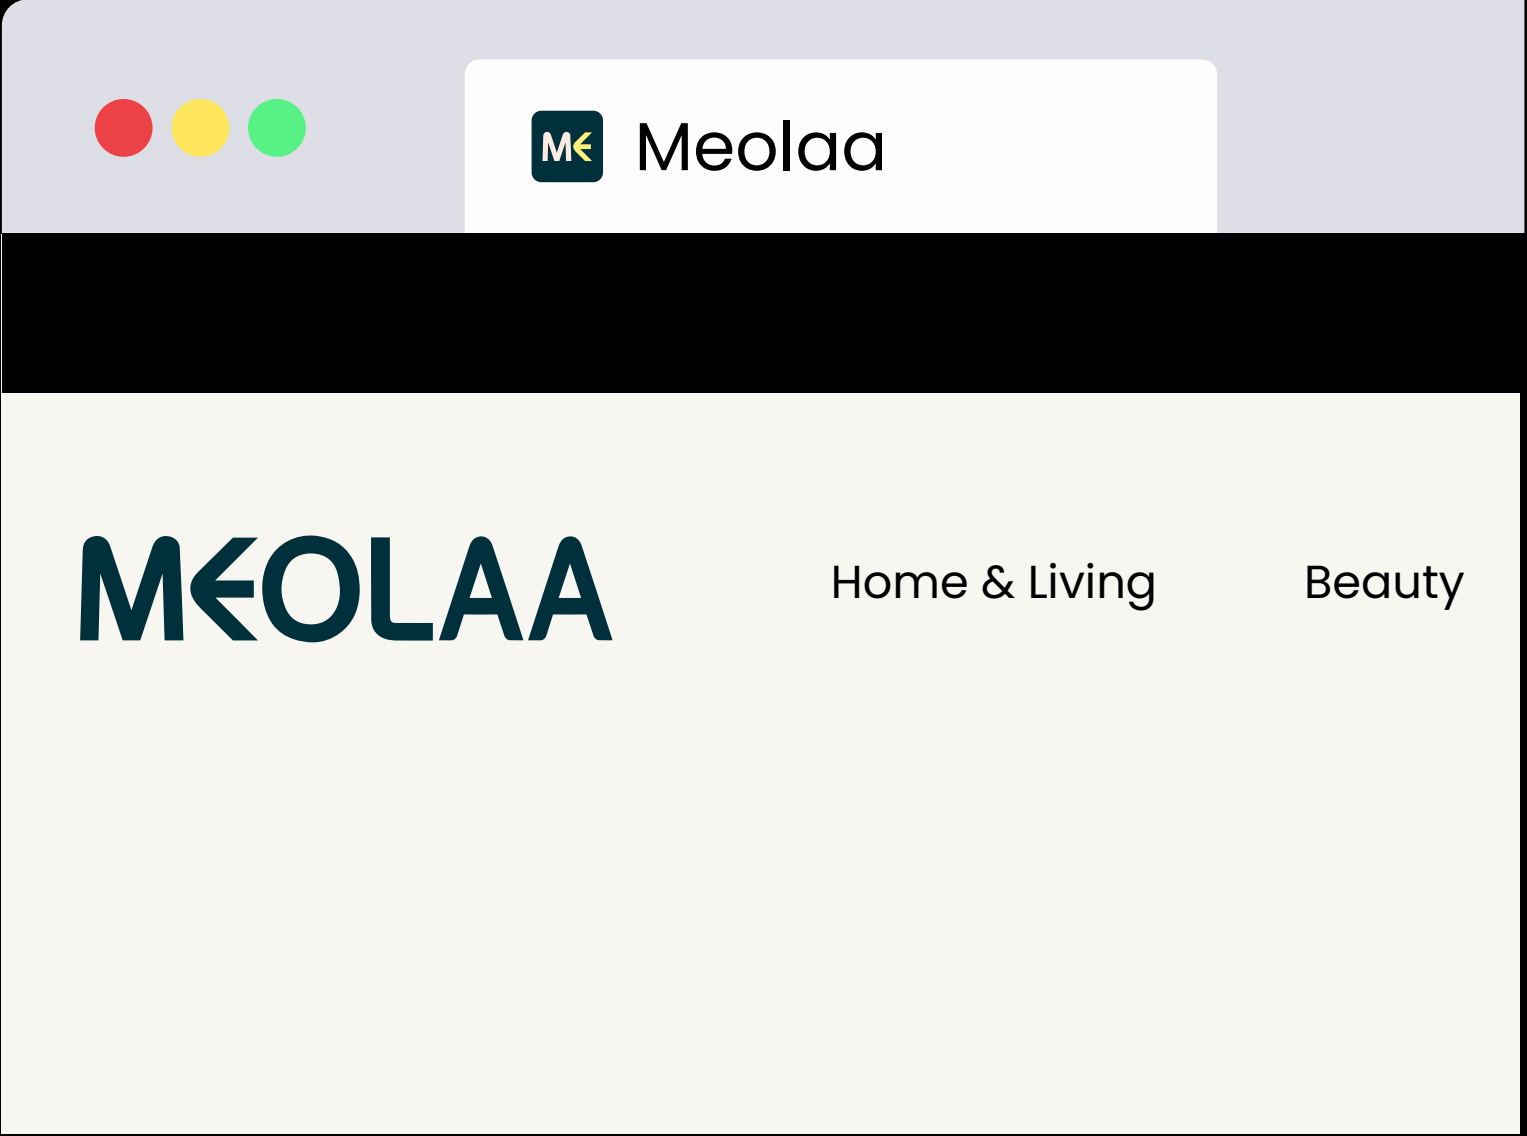

HORIZONTAL

LOGO USAGE

The logo should always be used consistently across all brand touchpoints to maintain recognition and visual integrity. Whether placed on a solid color, over imagery, or within digital interfaces, ensure clear visibility and contrast. The logo may appear in monochrome, brand colors, or be used as a social media avatar when space is limited. These examples demonstrate correct logo application across the main touchpoints.

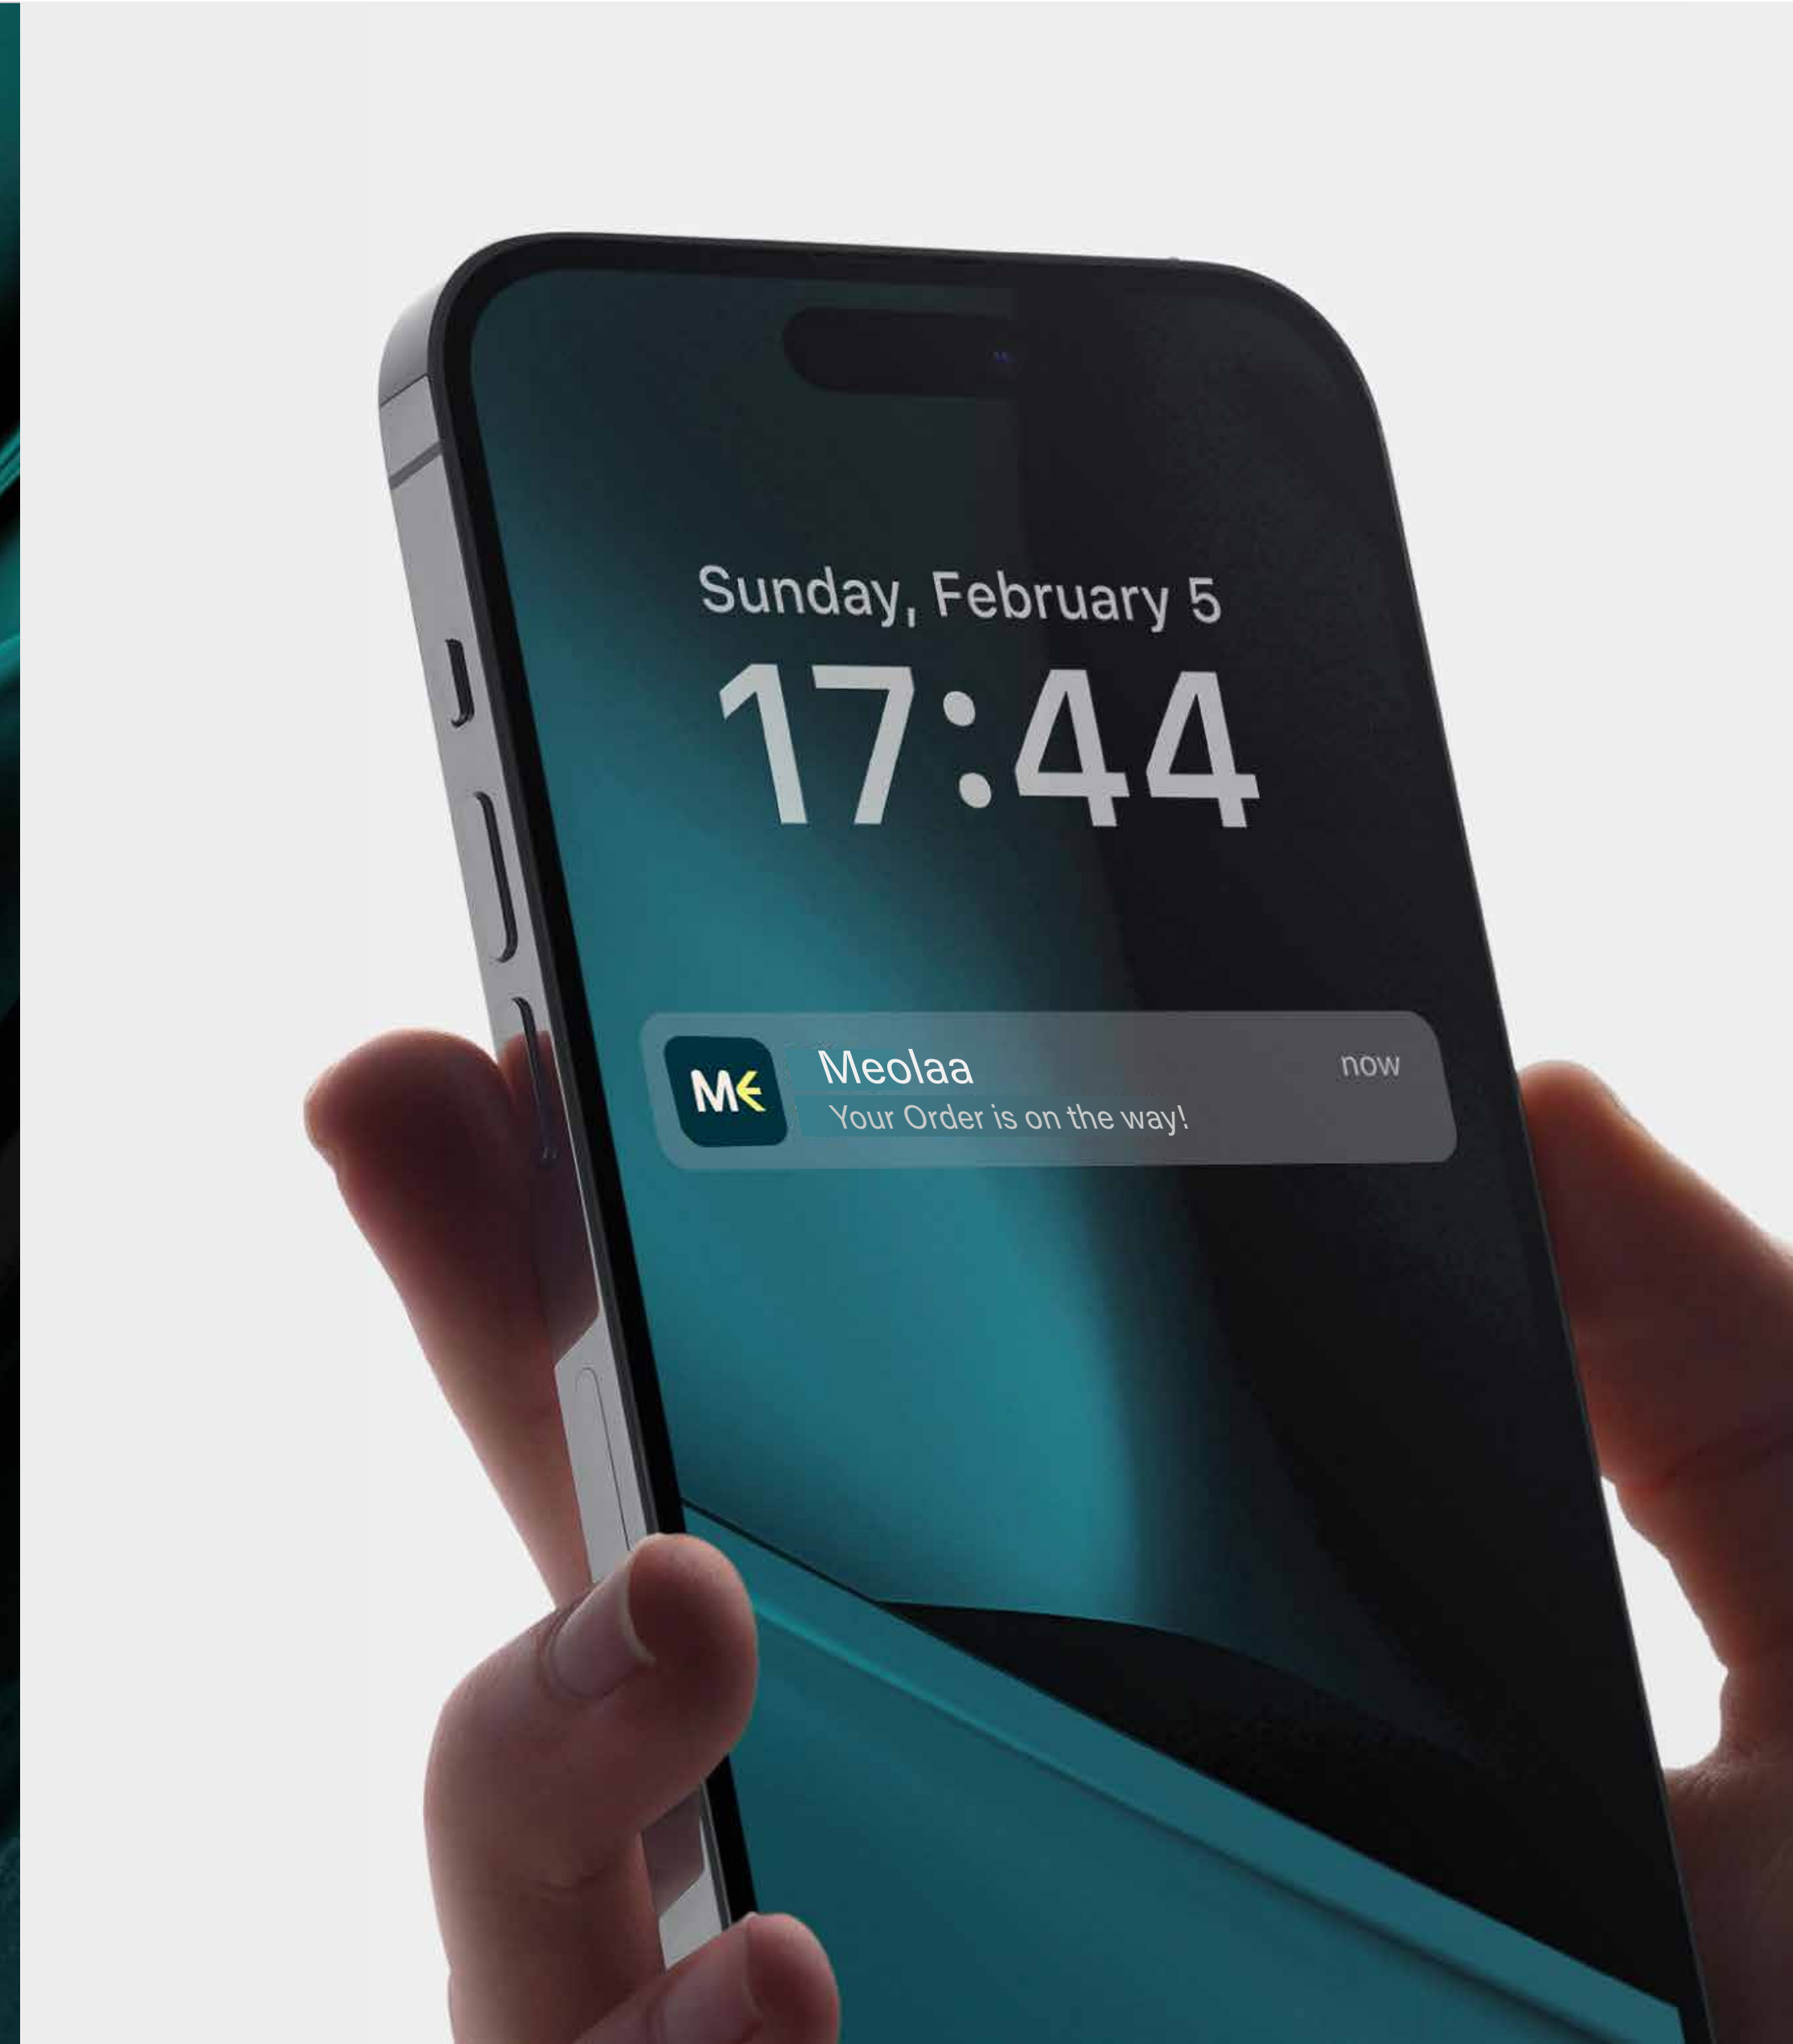

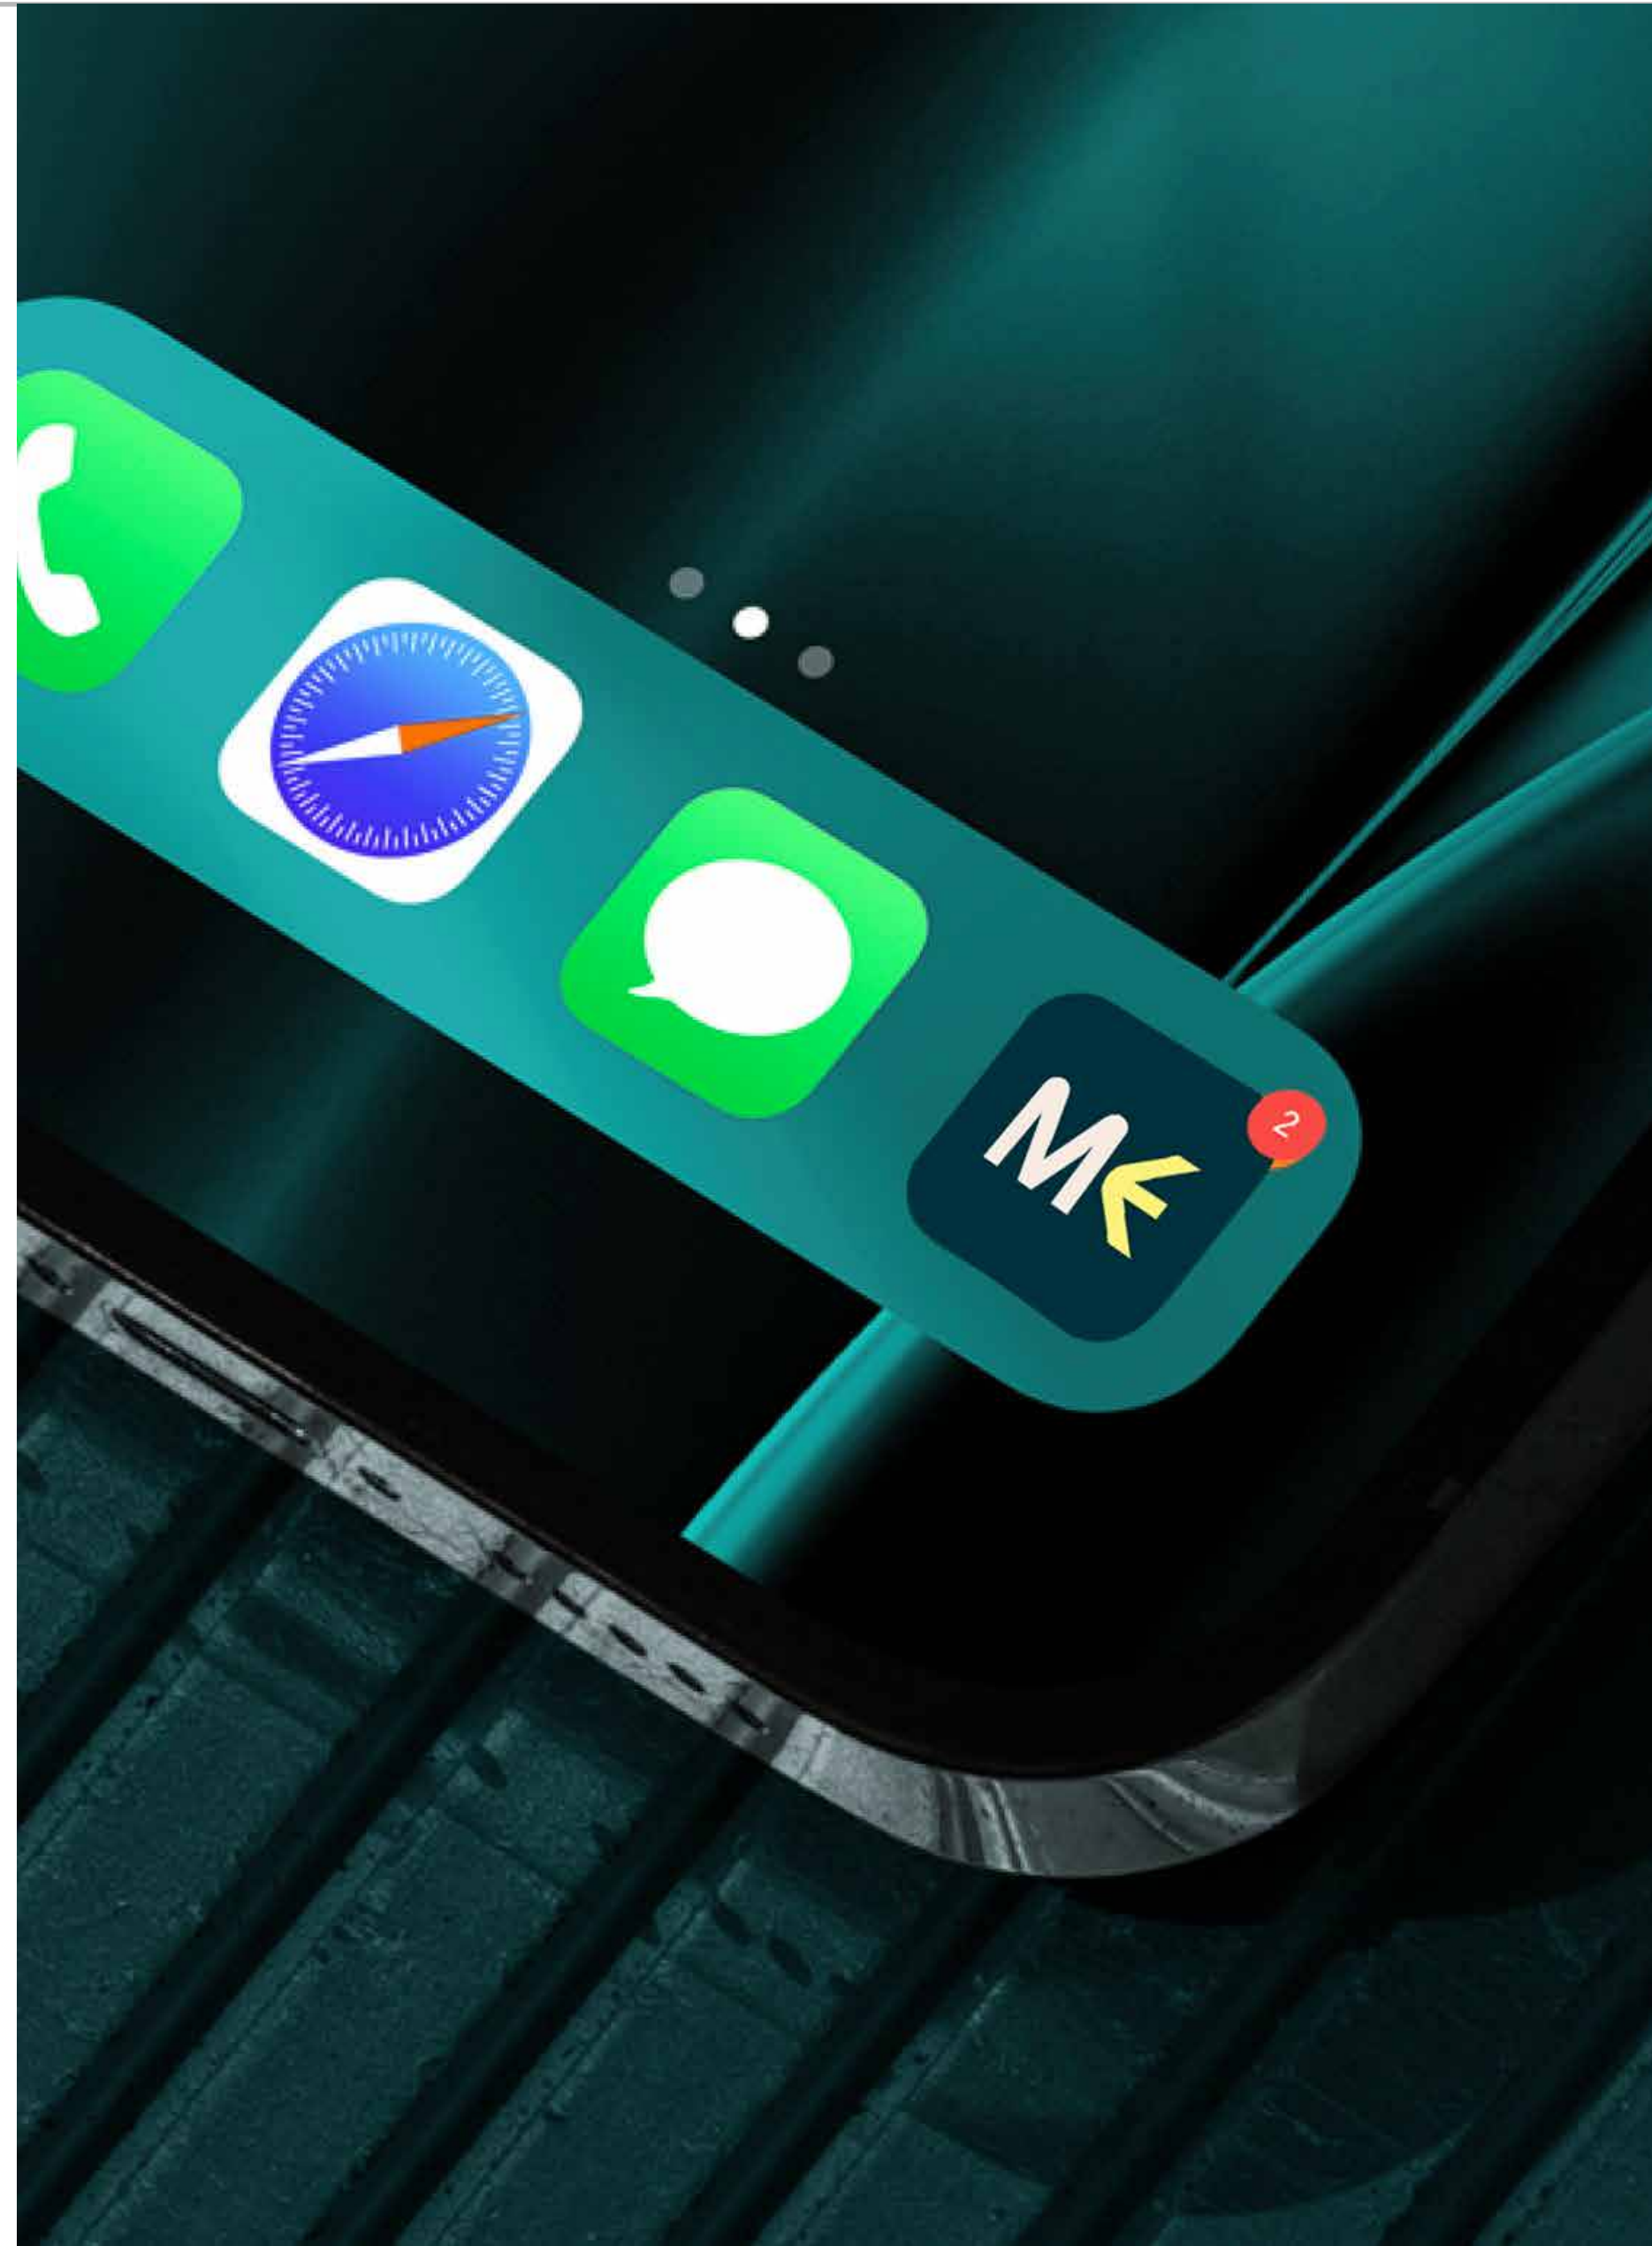

LOGO FAVICON

The favicon is a simplified version of the logo, optimized for use in small-scale applications like browser tabs, mobile apps, and notification icons. It maintains the brand's core identity by using the distinctive "M" and arrowform "E" within a square container. This ensures clarity and recognizability even at reduced sizes. When designing favicons, always preserve the logo's proportions and clear space to avoid distortion or clutter. The favicon has the M and arrow is two separate brand colours to bring our key brand element, the arrow to life and avoid reading it as 'ME.'

LANGUAGE

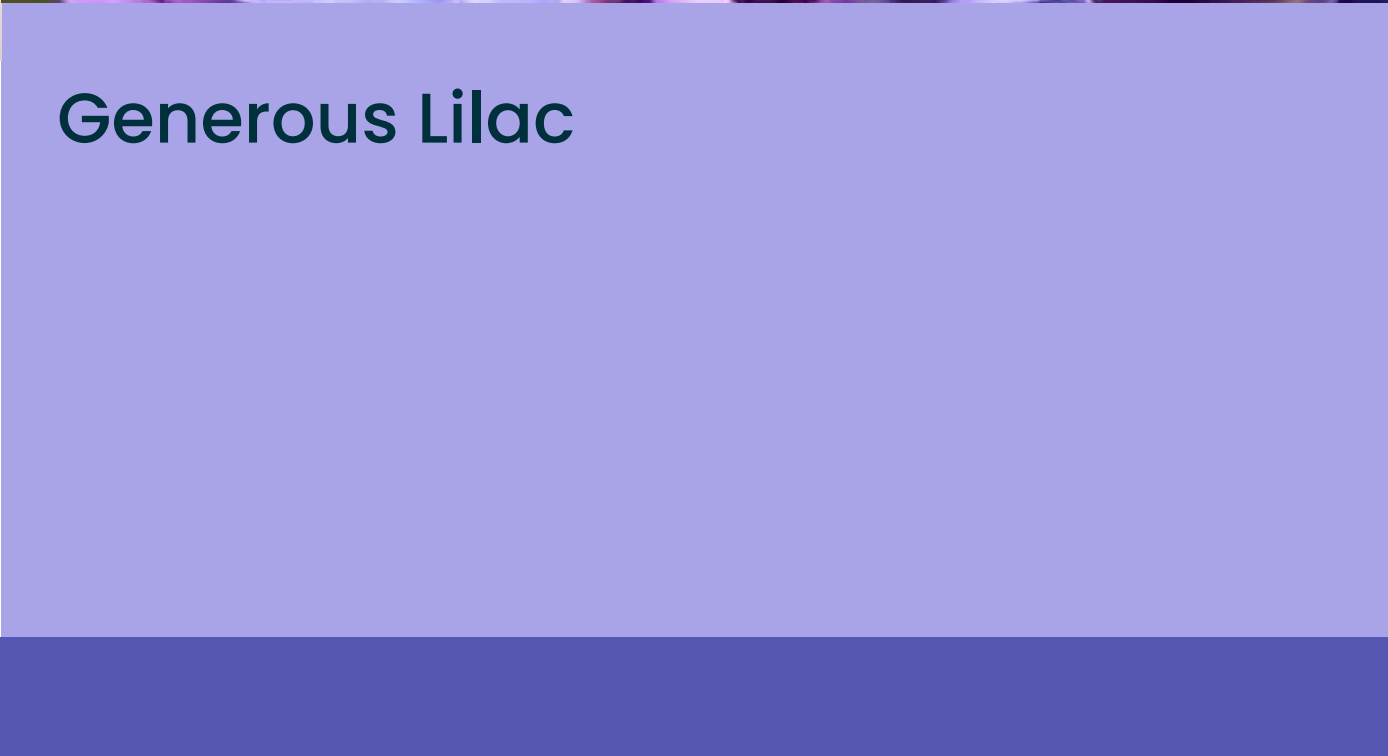

Joyous Yellow

Ecrú

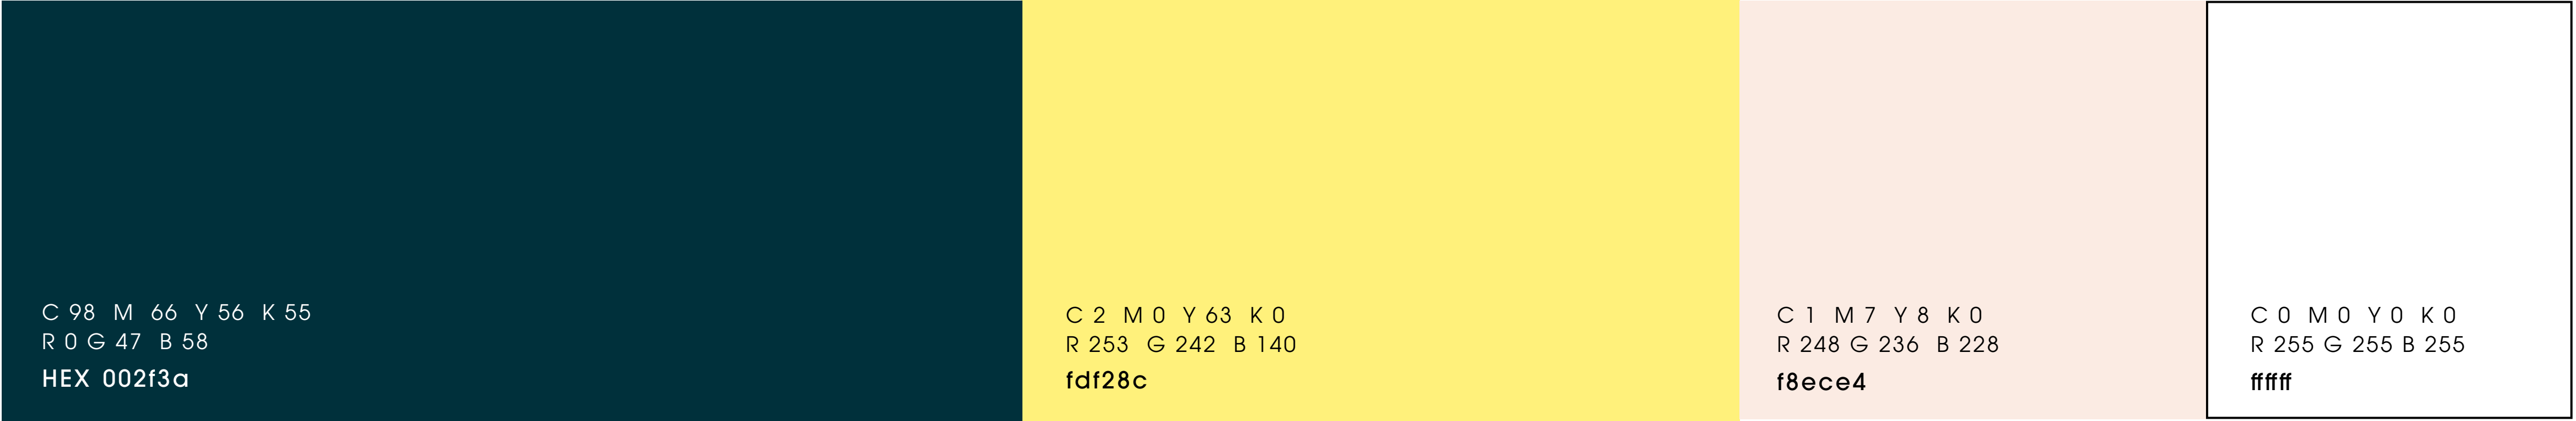

Planet Blue

Generous Lilac

VISUAL LANGUAGE – COLOUR ◀

PRIMARY

SECONDARY

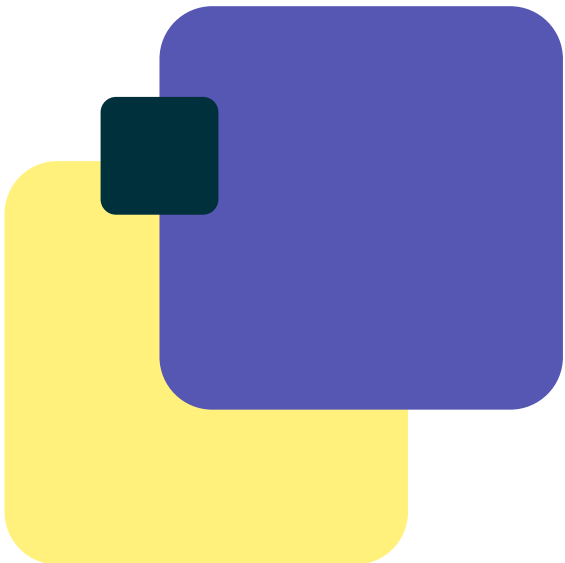

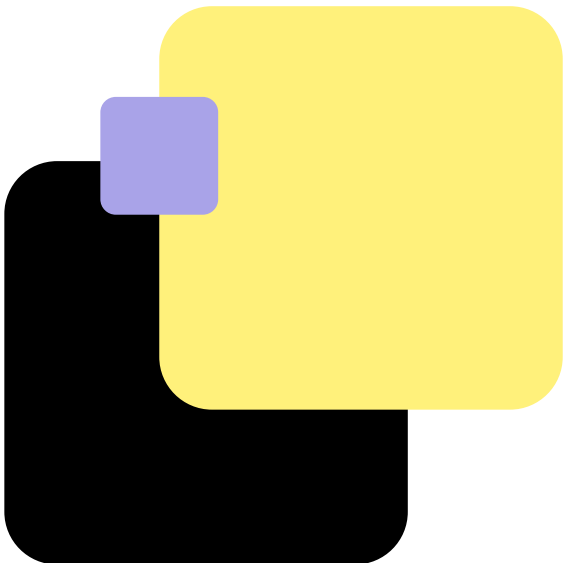

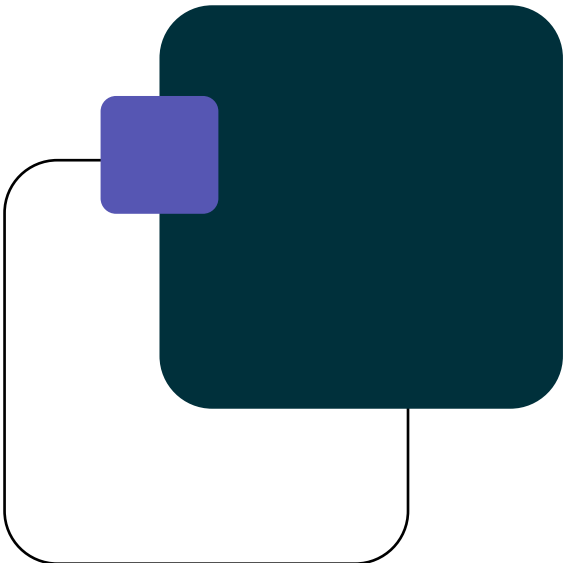

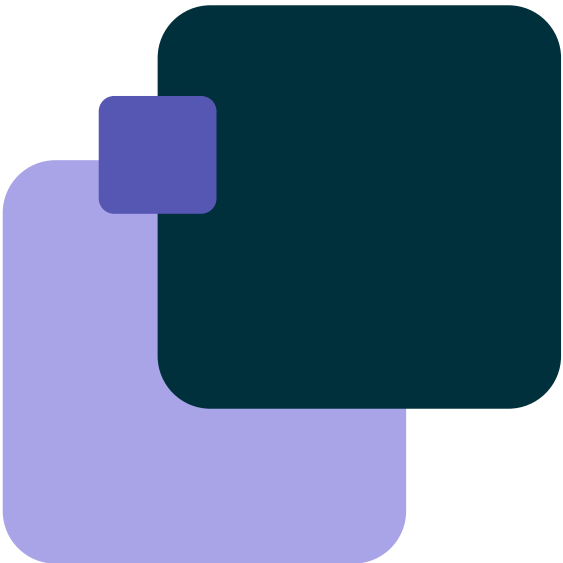

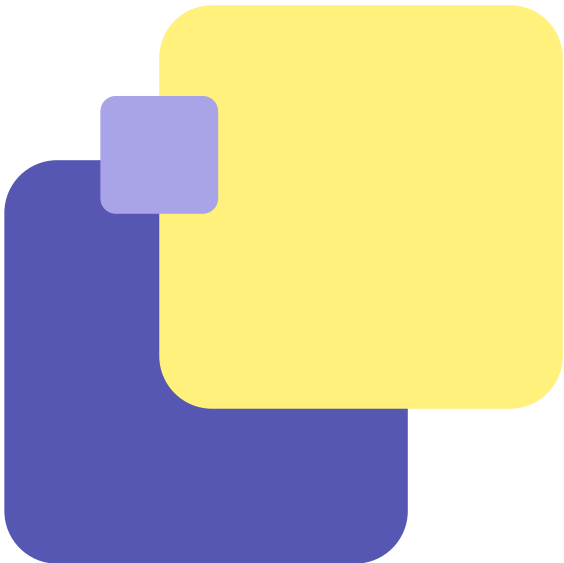

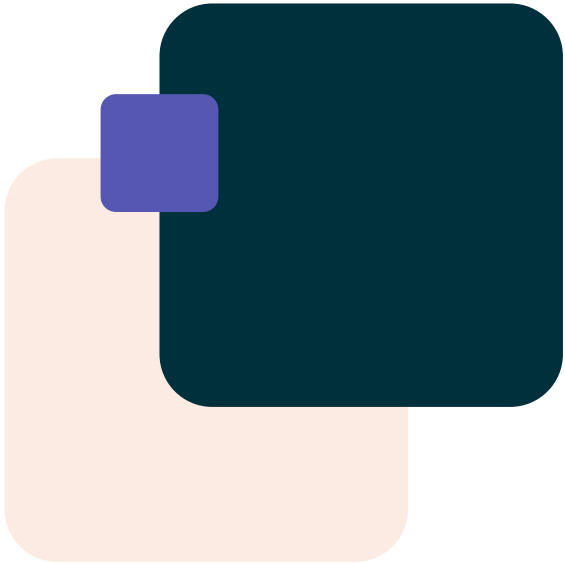

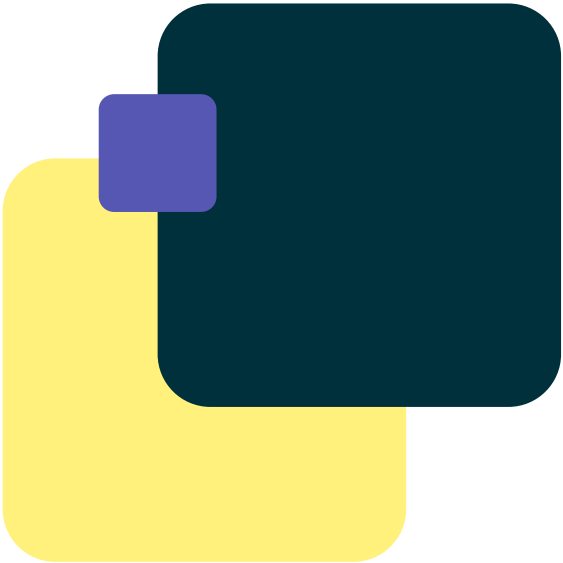

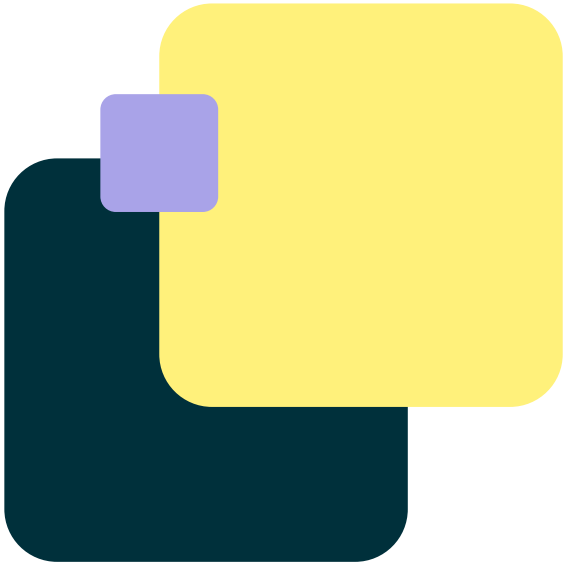

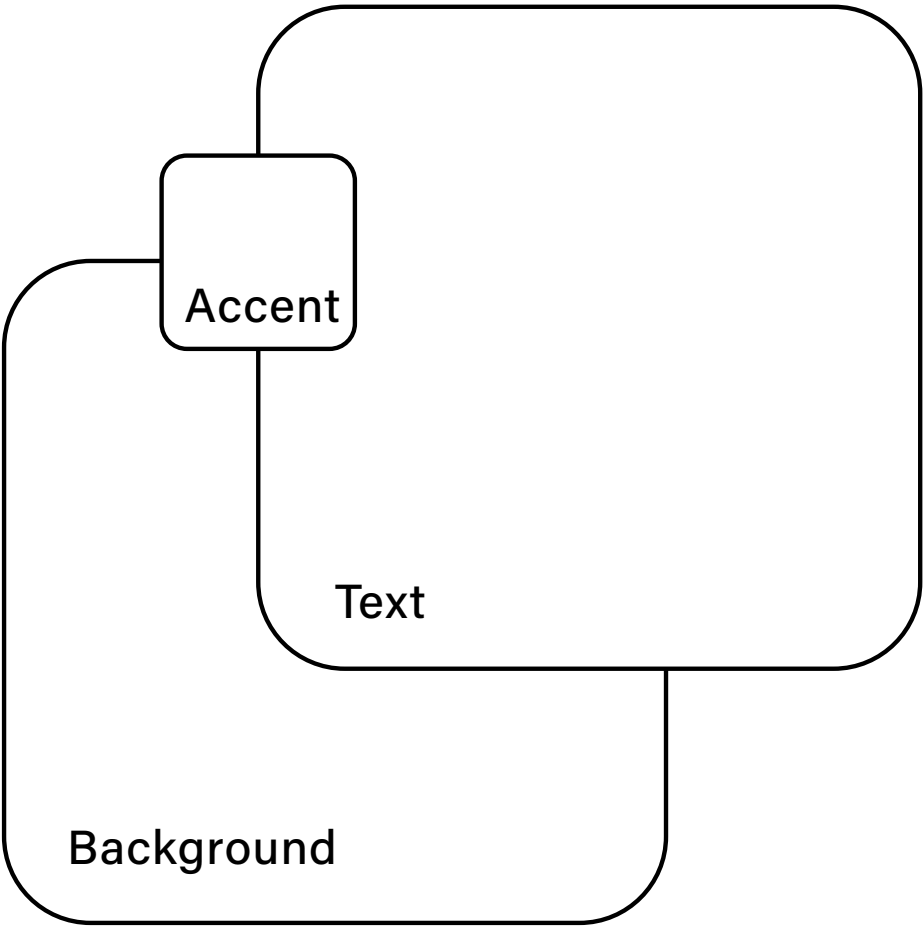

Our primary color pallete is a combination of the planet blue and joyous yellow. Our secondary color palette comprises of the lilac deeper and lighter shades and the ecru deeper shade along with a more sustainable green to balance out the deeper planet blue.

The blue, yellow and ecru to be used in a greater proportion across maximum brand touch points, the lilacs to be used as an accent colour and not in proportions that overpower the primary colours across brand collaterals.

SUGGESTED COLOUR PAIRINGS

Here is a collection of suggested color pairings from the brand palette. These colors work well on-top of each other and provide enough contrast for the reader. Each pairing thoughtfully layers Accent, Text, and Background colours to ensure optimal visual contrast in image layouts and 3d compositions.

WEB COLOUR CONTRAST

These colour combinations have been tested for contrast compliance to ensure readability across text sizes and background colours. The “PASS” labels indicate combinations that meet WCAG AA/AAA standards for both normal and large text. “FAIL” labels signal insufficient contrast that can hinder legibility, especially for visually impaired users. Always use the approved colour pairs to maintain clarity and enhance user experience across website and app. Avoid low-contrast text combinations, particularly for body content or essential calls to action.

TYPOGRAPHY ASSETS

FILL + STROKE

Bold typography layered with a soft, inflated stroke for added depth and emphasis.

OUTLINE

Clean and minimal linework used to highlight scale and structure without visual weight.

FILL + STROKE + USE OF THE ARROW

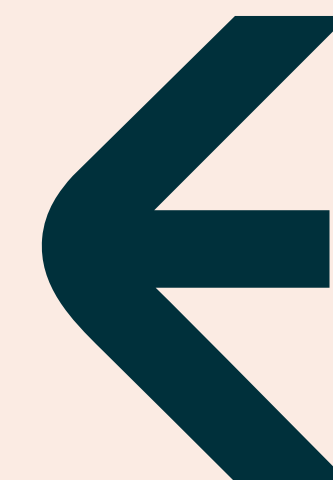

Combination of solid and outlined text with the signature Meolaa arrow monogram for brand reinforcement.

BRAND ELEMENT

THE ARROW

The arrow is a core graphic element that represents Meolaa. Derived from the logo, it serves as a versatile visual motif across touchpoints. It reinforces the idea of 'picking' while doubling as a navigational cue in web interfaces and communications. The arrow to be used only in approved colour combinations for consistency and impact across all brand materials.

Only this arrow is to be used, no other arrow form can be used in the brand language, ensure that the length of the horizontal arrow line remains the same across all touchpoints.

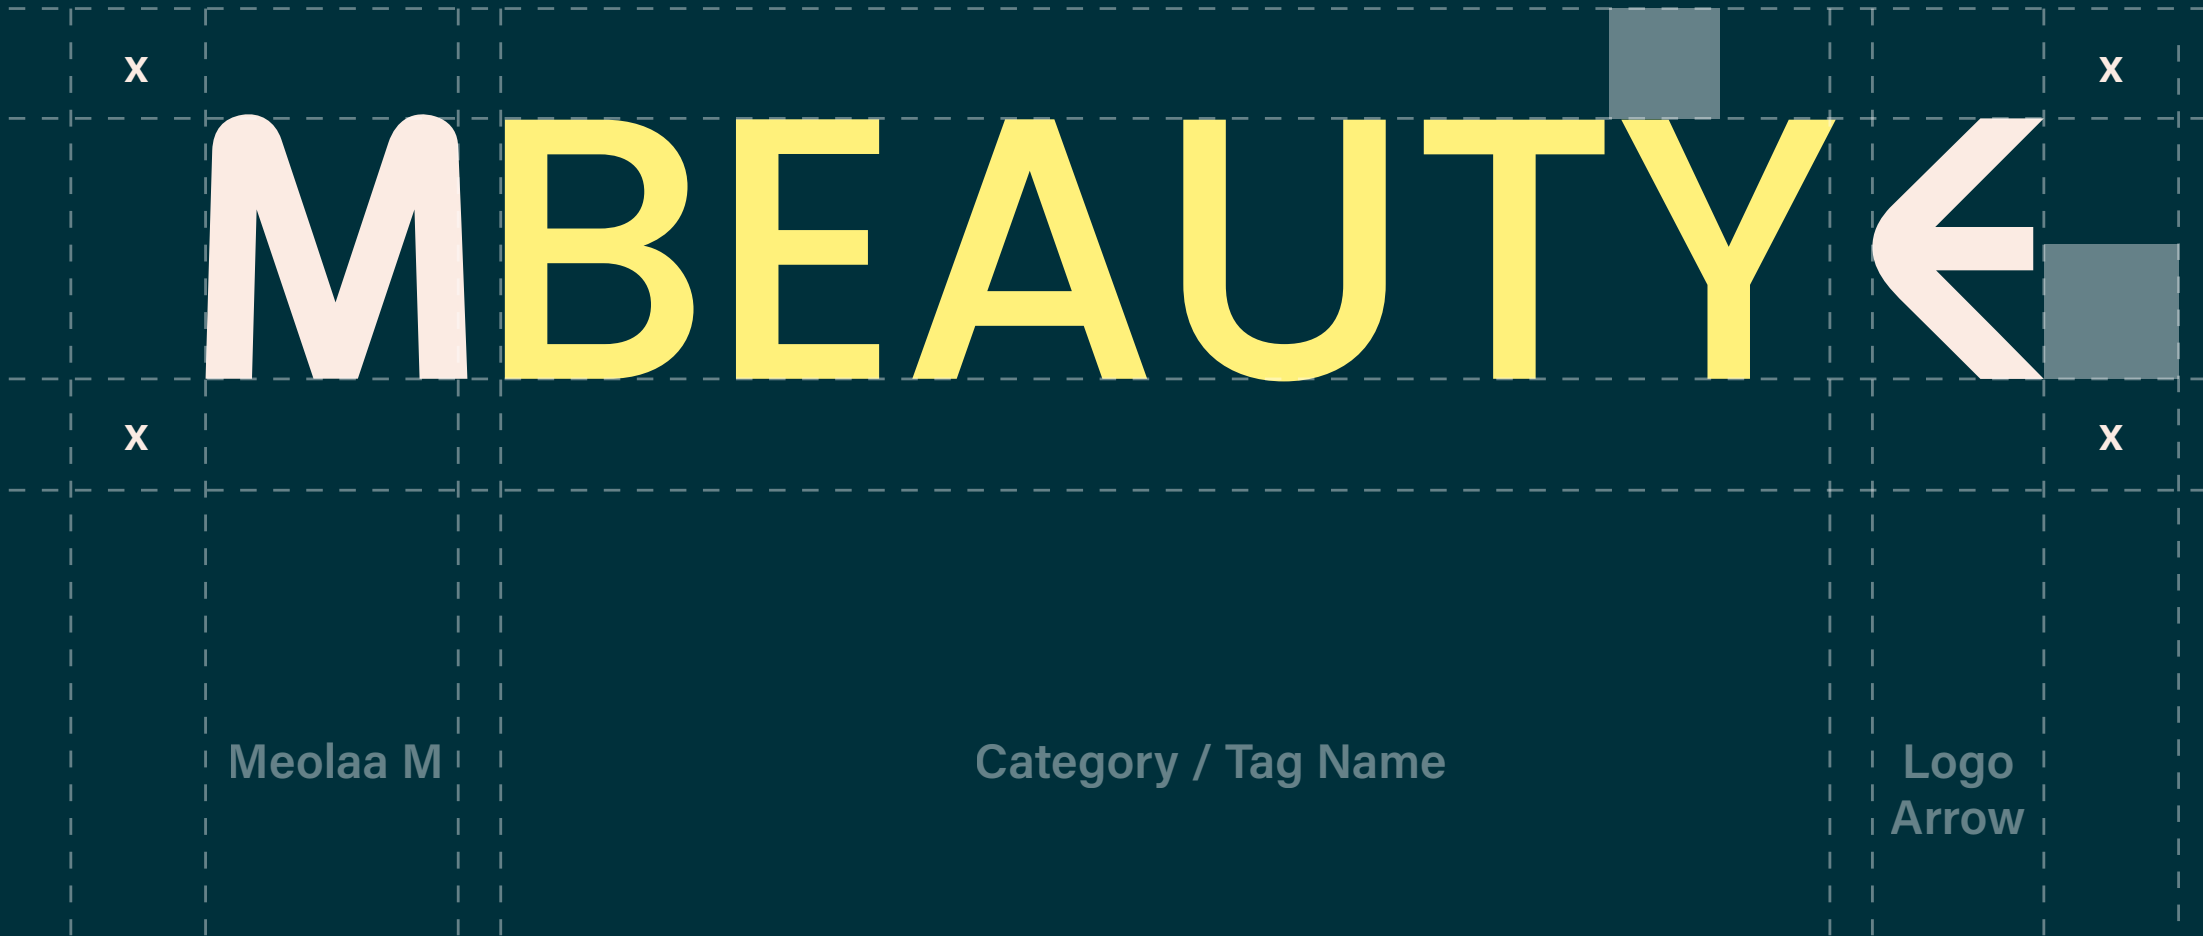

BRAND ELEMENT

THE ARROW

The arrow also functions as a category tag identifier within the Meolaa ecosystem. It bookends the brand’s categories—such as MBEAUTY, MFASHION, and MHOME — this creates a consistent, modular system.

- The ‘M’ and the arrow always retain its original proportion from the master logo.
- The category name sits in between, always aligned vertically and with equal spacing (x) from both the ‘M’ and the arrow.

(always in duo-tone the arrow and the text in
separate colours to avoid reading it as an E)

BRAND PATTERNS

THE ARROW

The arrow is used in dynamic and repeated formats to create seamless patterns. These patterns are a key part of the visual language and contribute to a cohesive brand experience across various touchpoints - image backgrounds, packaging, and digital interfaces.

ICONOGRAPHY

THE ARROW

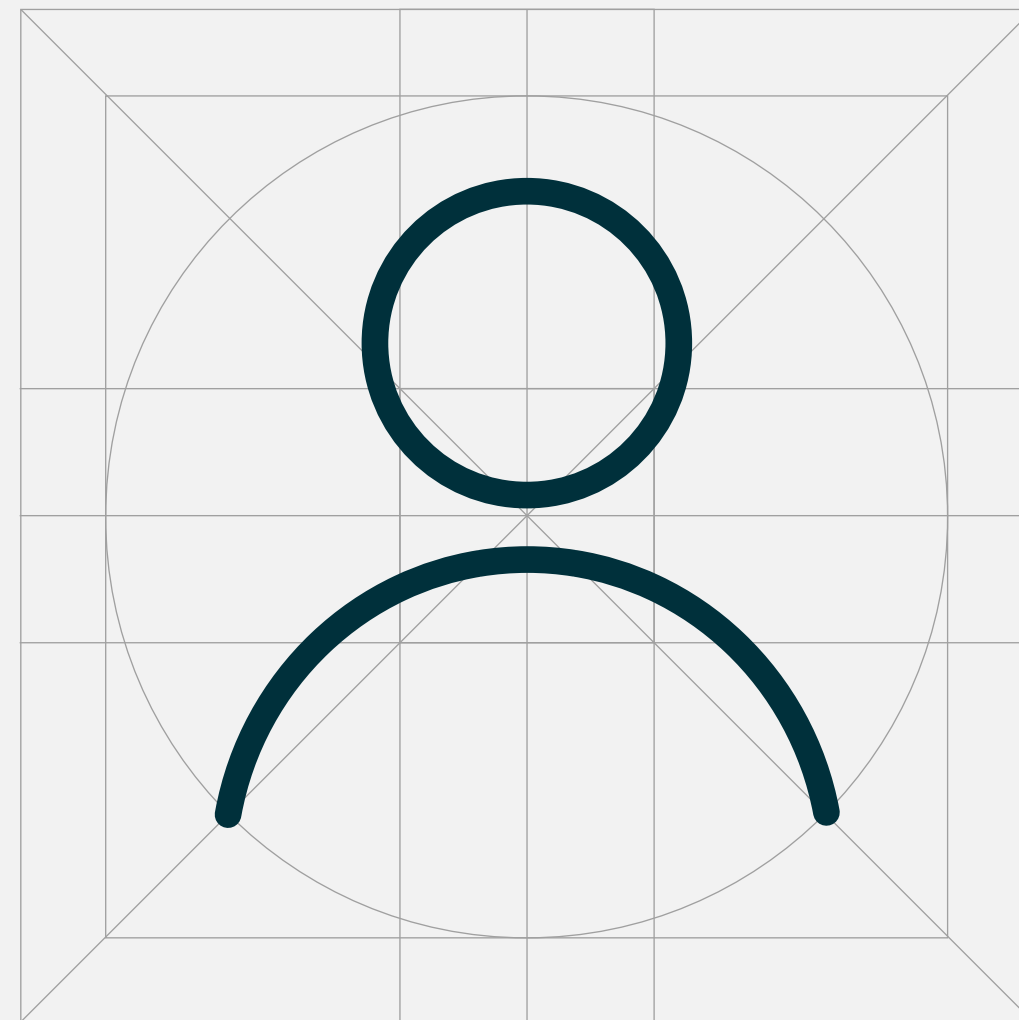

Within Meolaa's iconography system, the arrow functions as a foundational graphic element. The arrow is used to enhance each icon to be look more inline with brand and anchoring the iconography with consistency.

ICONOGRAPHY

THE ARROW

The arrow subtly forms the foundation of this design, merging seamlessly into the structure of standard icons.

ICONOGRAPHY

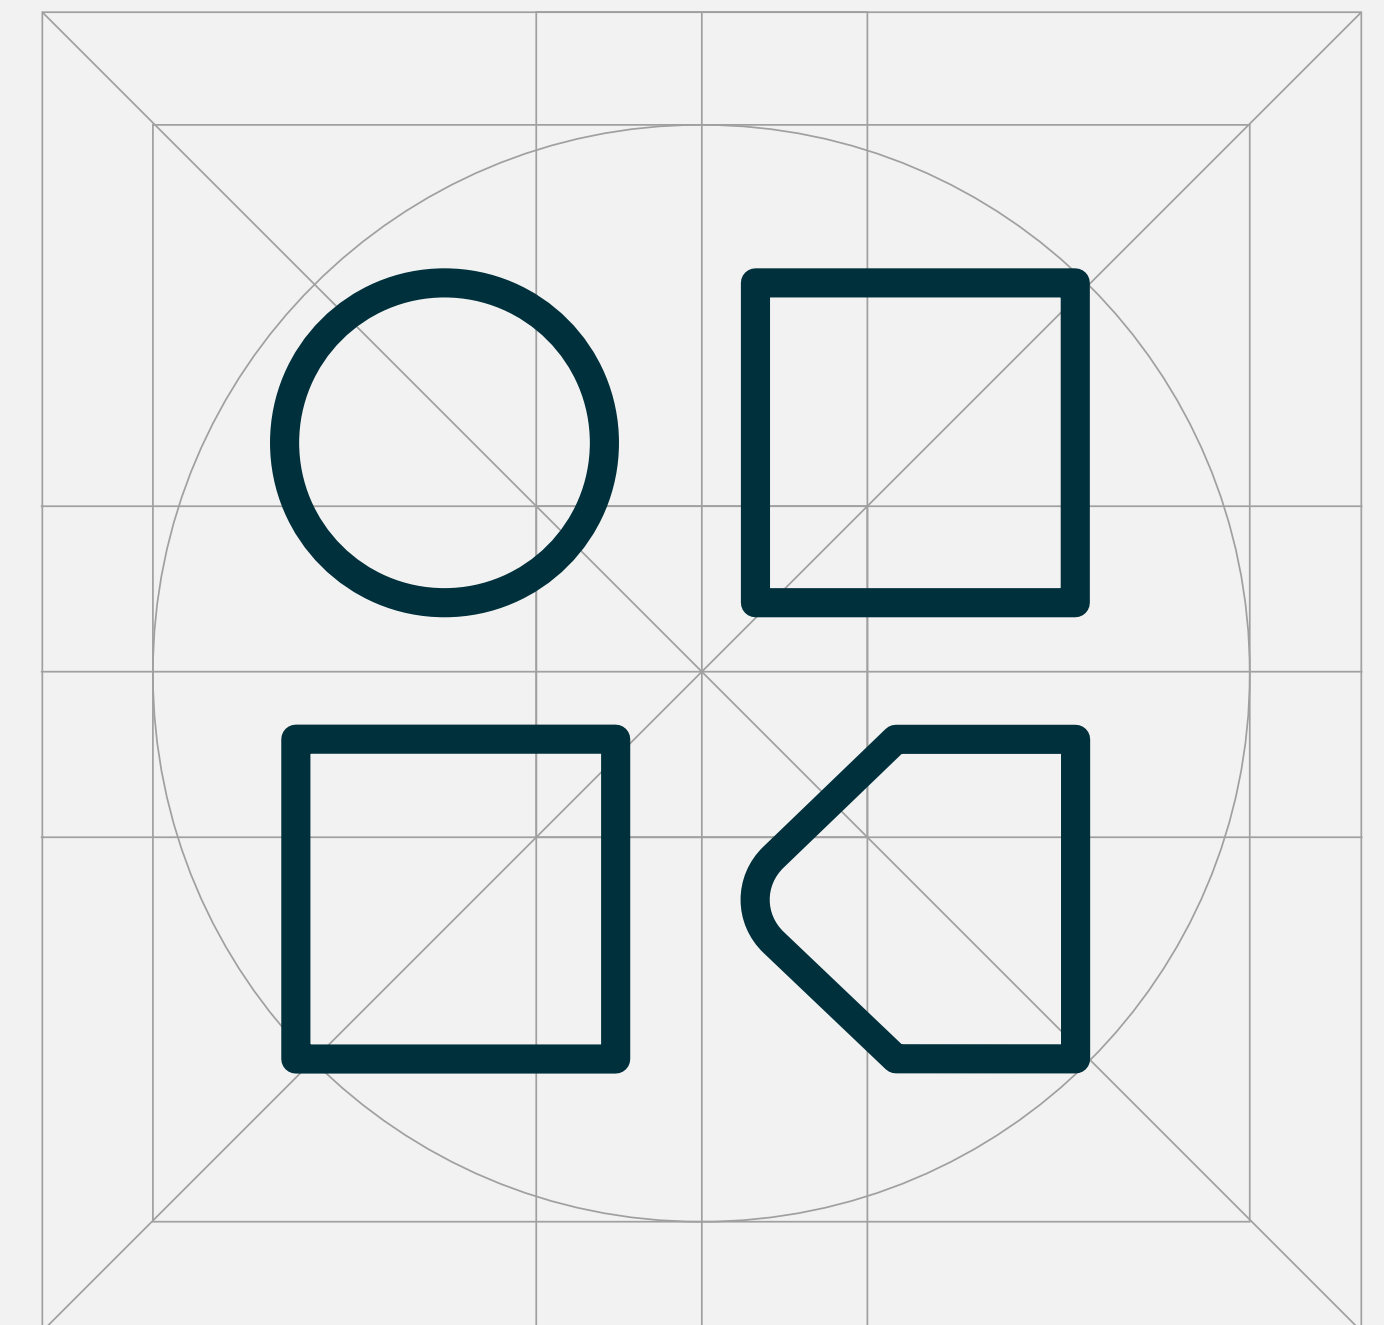

THE ARROW

When using the arrow as part of the icon construction, use it in the exact angle of the arrow in the logo, the direction is subject to change according to the icon, but the angle has to be consistent.

Outlined icons have a consistent stroke of 0.5 in a 20 x 20 px icon container.

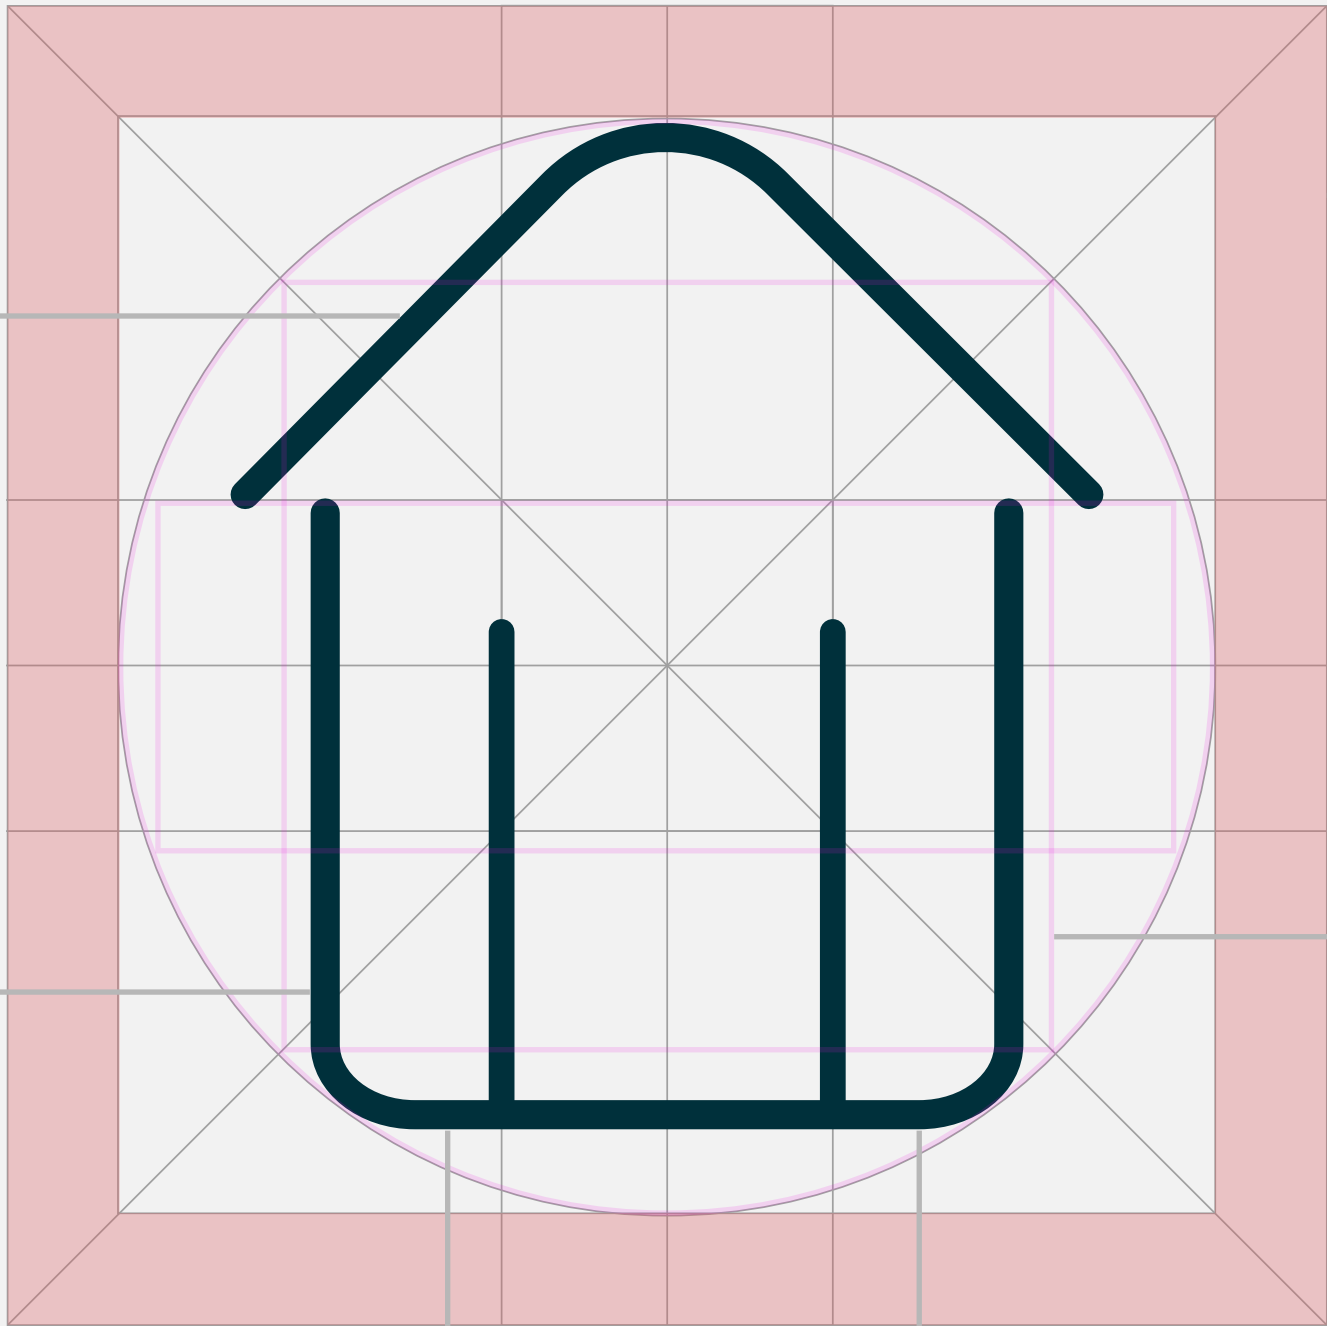

HEX F8ECE4

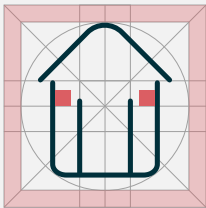

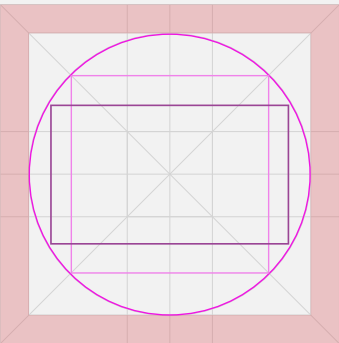

HEX 002F3A

Use either the Planet Blue or the Ecrú for the icons according to the contrast required in the usage.

The icon container is 20 × 20 px. The content of an icon should be confined within a safe space of 16 × 16 px.

The overall shape of an icon can vary from a circle to a square, or from a tall rectangle to a wide one. Always start with the following keylines, so that all icons have the same visual weight.

The minimum gap between strokes should never be less than 1.5px.

ICONOGRAPHY

THE ARROW

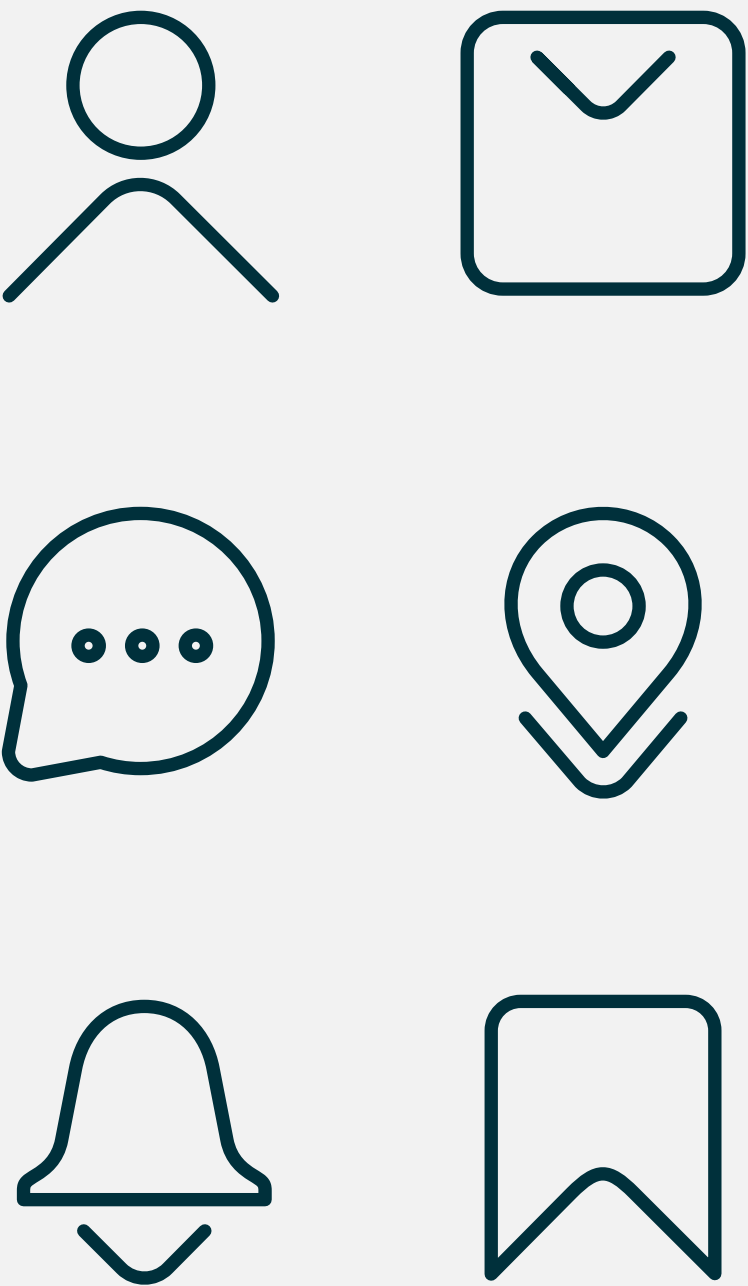

Universal

Use universally recognized symbols and metaphors as the starting point base to ensure icons are easily understood by a broad user base.

Consistent

Icons follow a cohesive visual style across the user interface. This includes a consistent use of line weights, shapes, dimensions, perspectives, and general style. Consistency in designs enables users to quickly recognize functionality and navigate the interface more intuitively.

3D BRAND ASSETS

Tags

Inflated visual callouts used to grab attention on offers and key info.

Stamps

Customisable visual badges that reinforce values like vegan, conscious, or approved. Used across to create personality and build emotional cues.

Illustrations

3d Illustrations that reflect the Meolaa lifestyle with charm and a surreal twist. They bring warmth and delight into the brand storytelling.

BRAND ASSETS

3D TAGS

3D tags are brand markers used to highlight key product attributes, promotions, and curated selections across Meolaa's platforms —such as "Bestseller," "For You," and "50% Off"—draw immediate attention while staying aligned with the brand's visual identity.

BRAND ASSETS

3D TAGS USAGE

Colour Usage

When using tags on product cards make sure the colour of the tag does not clash with the background image used and the area where the stamp is placed is not too busy. If needed, invert the colours of the tag to use the reverse contrast.

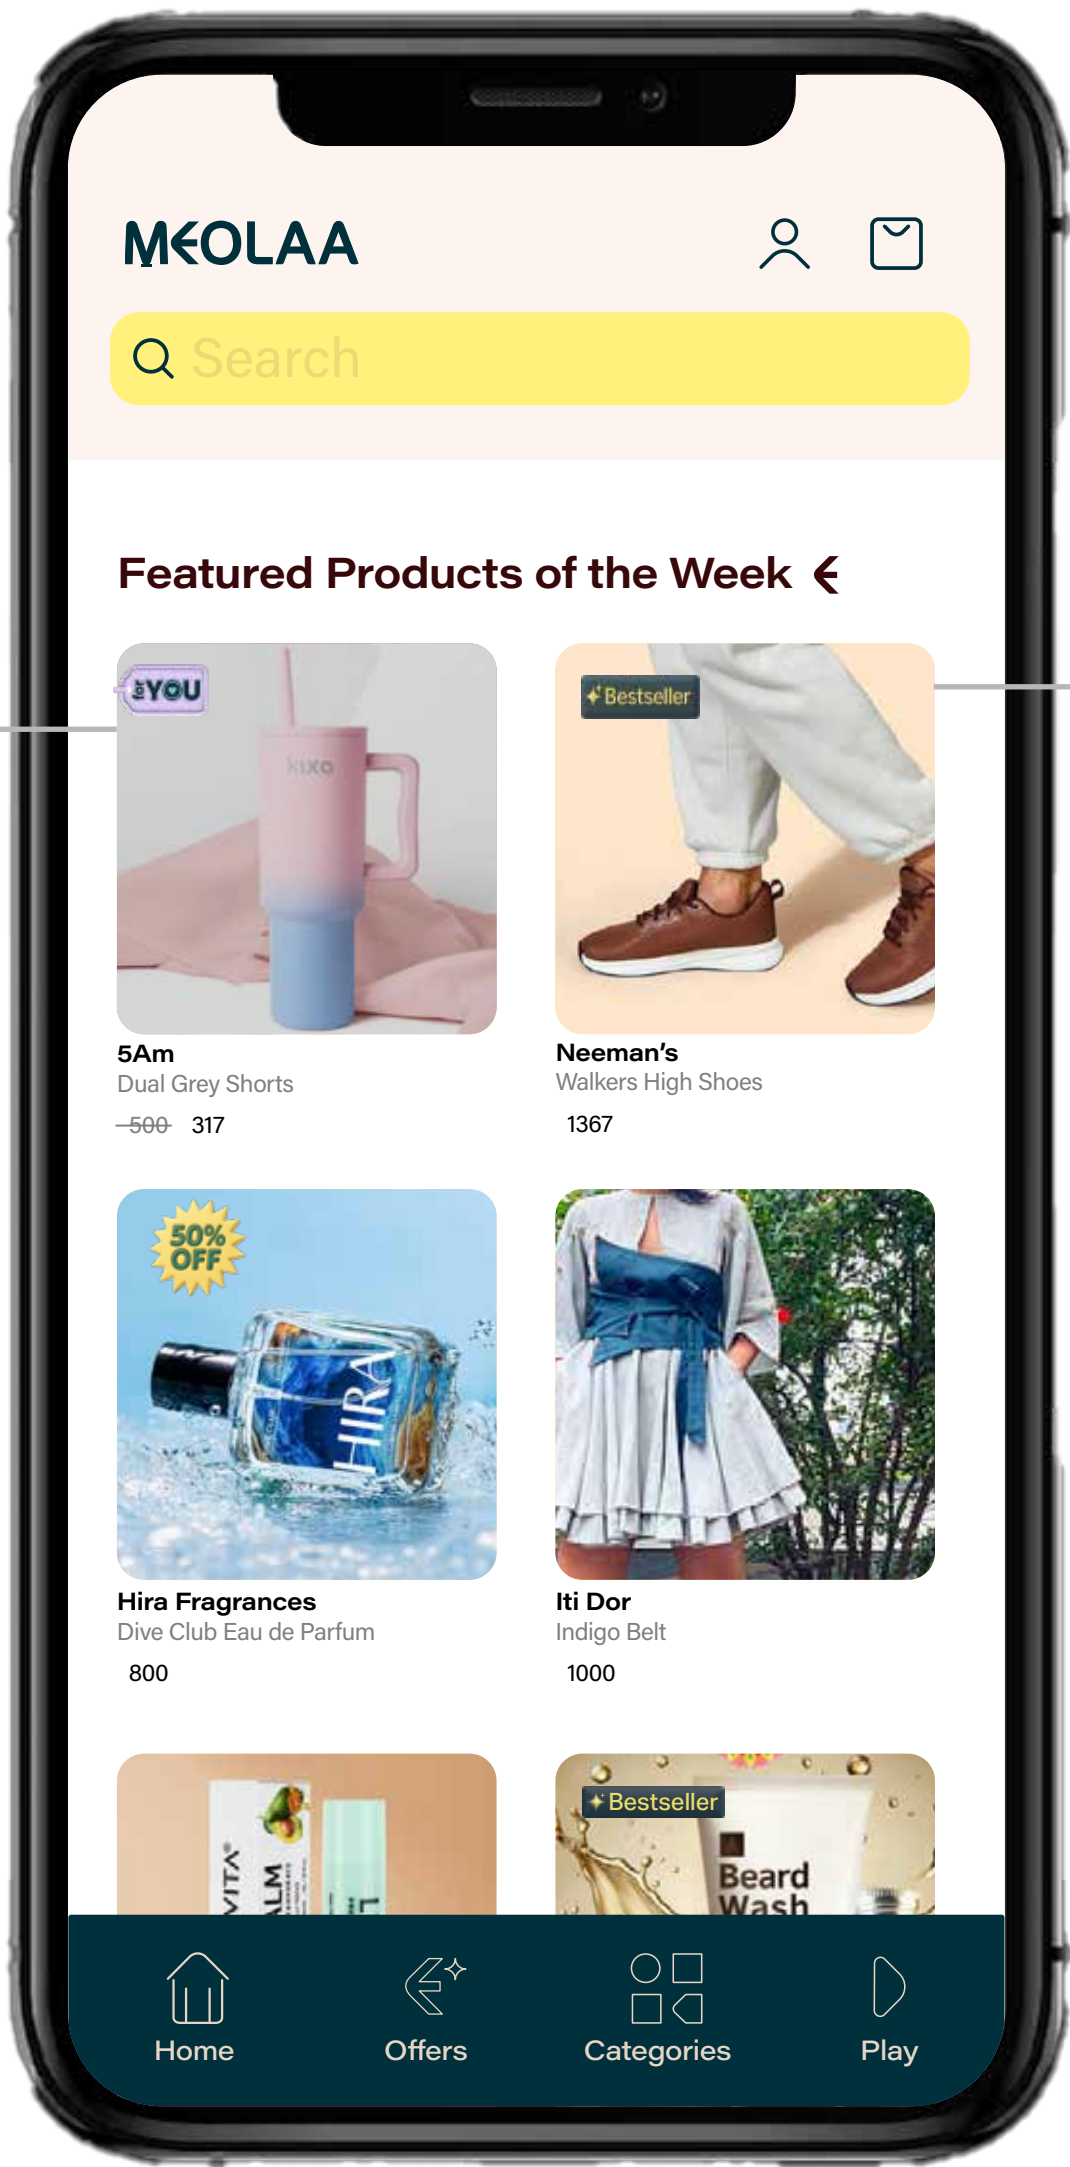

Scaling

Make sure the tag is scaled down to occupy only 10% -15% of the entire product card or image when used on the app or website.

The tag itself cannot run more than halfway vertically across or horizontally across.

Position

Ideally, the tag should be placed on the top left for visibility on a product card or product image with a padding of 2mm on the top and left side .

BRAND ASSETS

3D STAMPS

3D stamps serve as official seals of trust and curation. Designed to feel authoritative, these stamps—such as “Meolaa Picks” and “Meolaa Approved”—are inspired from seals of credibility across the board. The use of bold typography ensures legibility, and signature elements like the Meolaa monogram ensures consistency and recognition.

BRAND ASSETS

3D STAMP CONSTRUCTION

Offset Path: Round, Miter 4

Create a basic stamp using elements + typeface. Make sure the typeface is legible when scaled down. Make an offset Path to create an outline of the base stamp created.

3D & Materials; Inflate; Center Lighting Rotation + Metallic

Height: 90% Softness: 60%

Group the elements together and using the 3D & Materials, apply the Inflate effect with some metallic highlights in the material section and a centre rotation in the lighting section.

BRAND ASSETS *3D ILLUSTRATION*

Inflated Look

Clean, rounded and smoothed similar to inflatables. Avoiding realism or sharp detailing.

Clean Composition

Don't overcrowd illustrations, use negative space egenerously. Avoid adding too realistic or overly technical elements.

Soft Lighting with Minimal Shadow Harshness

Shadows are soft-edged and minimal, just enough to ground elements and add subtle depth.

Brand Colours

Mainly using brand colours that are applied uniformly across objects with matte finishes.

BRAND ASSETS
